Internship Abroad: India

More than 1,600 languages, 1.3 billion inhabitants and climate conditions from alpine to tropical - India is a country with many contrasts with scenic, linguistic and cultural diversity. In recent years, a rapid economic upturn has been experienced, which especially can be observed in the field of mobility.

Turbo Energy Private Limited (TEL) develops and manufactures complex turbochargers as well as their components. The products can be applied to automobile, industrial and marine segments. As part of the TVS Group, TEL produces around two million turbochargers per year. With a market share of over 60 %, TEL is the largest turbocharger manufacturer in India.

Are you studying mechanical engineering or a similar subject? Would you like to gain professional and intercultural experience abroad to complement your academic training? Then the following opportunity is perfect for you:

Internship in India

**Tasks:**
